

Prenatal Genetic Counselor Needed for Medical Genetics Center Dallas, TX

Job Title: BC/BE Prenatal Genetic Counselor(s)

BC/BE Prenatal Genetic Counselor(s)

GeneCare Medical Genetics Center has an opening for a part-time possibly full-time prenatal genetic counselor to join a busy practice in Dallas, TX. The successful candidate will have a Master's degree in genetic counseling from an accredited graduate program, the ability to thrive independently and as part of a team, and strong organizational and interpersonal skills. Experience in prenatal counseling is preferred, but not required.

Job responsibilities include: reviewing patient information; providing prenatal genetic counseling for all traditional indications; communicating lab results to patients and physicians; coordinating follow-up care and appropriate referrals; participating in conferences; acting as a genetics resource to the medical community; and maintaining communication between patients, the practice, and the company.

GeneCare is a comprehensive genetics center with counselors in Texas and North Carolina. This position provides a unique opportunity to work independently at the practice, while taking part in the benefits of a larger team of counselors. In addition to traditional genetic counseling responsibilities, this position includes participation in national nuchal translucency training courses with physicians and sonographers from the Fetal Medicine Foundation. We offer a competitive salary and benefits package.

If interested, please send your resume and cover letter (including salary requirements) to Aimee Kirkman
